

AUSTRALIAN FIRE & FIRST AID

REMOTE FIRST AID

DESCRIPTION

This course applies to living, working or travelling in remote or isolated areas. It is particularly relevant for people working in mining, environmental research, outdoor recreation, eco tourism and many other pursuits that take them away from populated areas.

PREREQUISITES

This unit has a pre-/co-requisite of HLTF301B Apply First Aid, which must be completed either prior to commencement of the course, or completed in conjunction with it. Students must have a suitable level of literacy and numeracy to undertake assessments.

DURATION

2 days (14 hours) classroom training and assessment with theory learning and assessment completed in class.

ASSESSMENT METHOD

Progressive assessment throughout the course, including demonstration of practical skills and written and oral questions relating to underpinning knowledge.

COURSE CONTENT

- + Preparing for isolated travel or work, accounting for expected contingencies
- + Assessing a casualty's condition to determine the appropriate response
- + Evaluation of options for obtaining medical assistance and/or transporting the casualty
- + Monitoring a casualty's condition and undertaking ongoing first aid procedures as required
- + Provision of shelter from the elements and comfort for the casualty
- + Establishing communications and working in conjunction with medical and emergency services support
- + Evaluation of incident management and participation in debriefing to improve future planning and response.

COURSE CODE - HLTSS302-412 Provide First Aid in Remote Situation
